FURNITURE PACKAGES & INTERIOR DESIGN

Need furniture for your
▪ Forever Home ▪ Airbnb ▪ Holiday Home

WHAT WE DO

Our team of experienced interior designers specialise in tailored turnkey furniture packages and styling.

Our designers work within budget, timeframes and personal taste to create the perfect bespoke environment that feels like home.

You can rely on our team to efficiently manage the full process from concept to completion for your home, holiday apartment, investment property, serviced apartment or hotel/resort.

INITIAL CONSULTATION:

One of our qualified interior designers can meet you at your property or via video chat, if interstate or overseas to assess the scope of work needed for your property. They will take any measurements and offer direction and advice for styling.

DESIGN CONCEPT:

After meeting with a designer they will then provide you with a service offering and design concept with a general direction based on your own personal style. Once confirmation has been provided to proceed with a package the designer will then create a detailed itemised inventory in collaboration with you, complete with commercial grade designer furniture, homewares and soft furnishings.

INSTALLATION AND REMOVAL:

Once the furniture has been selected, your designer will coordinate the installation of your furniture package and make sure everything is checked, delivered and styled to perfection within your home.

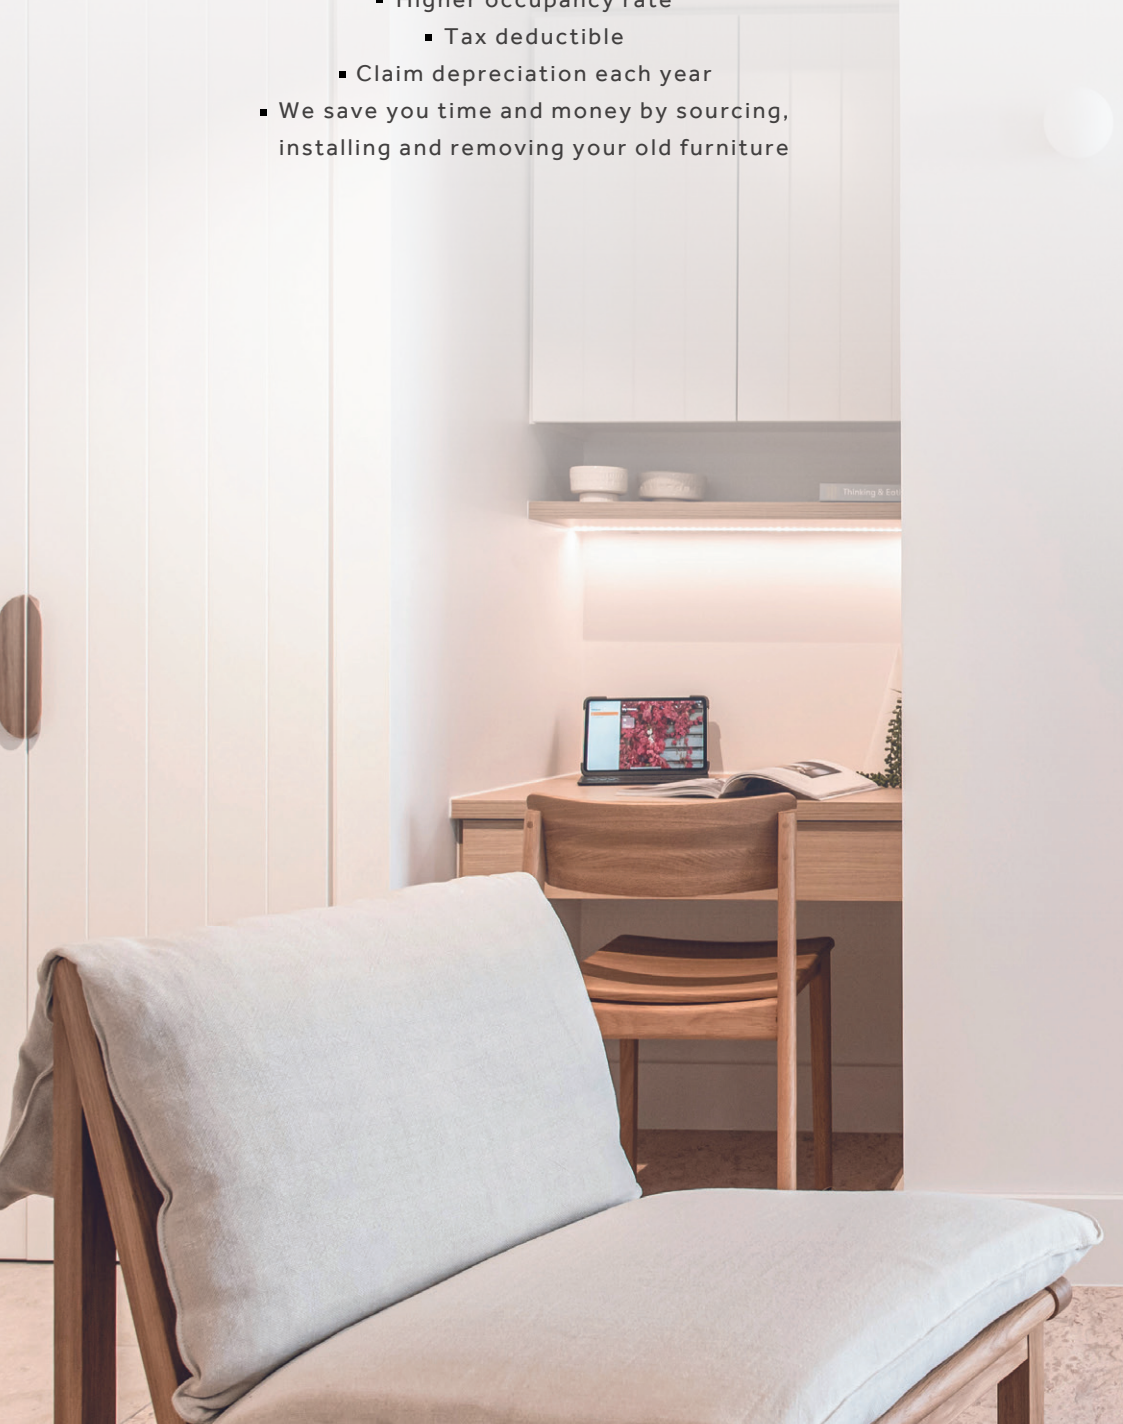

We remove all of the packaging. We are also able to save you time and money by removing your old furniture.

We donate pre-owned furniture to Sunny Kids, a local Sunshine Coast charity that provides emergency housing and furniture to families in need.

It's time to breathe new life into your forever home, vacay, rental or living space with a custom furniture package.

INVESTOR FINANCIAL RETURNS

- Increase rental returns
- Higher occupancy rate
 - Tax deductible
- Claim depreciation each year
- We save you time and money by sourcing, installing and removing your old furniture

"Buying a house in Noosa Heads when we were in Wellington, NZ was an exciting although fairly easy experience. Fitting out the house with nothing to start with and no contacts was feeling an impossible task. The agents told us "talk to Blink", and it was the best advice we received. It took a bit to get over the mental side of "someone else is styling my home", but what clinched it for us was just how approachable and easy Jess was, and the extra miles Jess went to.

We had video calls with measuring tapes, Jess answered all our silly questions as it was hard to remember the house, and all throughout, nothing was too much trouble. More importantly was her styling was perfect. We unlocked our new home door after a day of travel, it was dark, and we were blown away. All we needed to do was lie down, the beds were made and ready!

The reality of what Blink can do is so much better than the pictures and we would not change a single thing. I have no hesitation recommending Blink to anyone wanting their house to look amazing without stress or mess."

Change Director

BENEFITS OF FURNITURE PACKAGES

Are you unsure whether a furniture package is right for you? Working with an interior designer to style your home offers a range of benefits that you don't get when picking furnishings yourself.

CONVENIENCE:

If you are looking to inject new life into your home but you don't have the time to do it yourself, working with an interior designer to prepare a furniture package for your home can be a convenient way to transform your space.

At Blink Living, our team of designers work with you to understand your desired aesthetic so they can revamp your home to suit your vision.

SUITING YOUR BUDGET:

Furniture packages can be tailored to suit any budget. Interior designers are often able to source pieces directly from wholesalers, which means you end up paying less than retail.

Plus, when you invest in a furniture package you pay a single, all-inclusive price for all of your pieces, which includes sourcing, delivery, installation and styling. This can often be a more cost-effective solution to refurbishing your home than purchasing each item separately.

EXPERT ADVICE:

Finally, when you work with an interior designer to style your home, you are able to tap into their experience and expertise. They are familiar with the ins and outs of interior design and space sizing. They can help guide you through the home styling process and provide suggestions and solutions to any of your furniture and accessory queries.

"Mosaic Property Group engaged Blink Living, led by Jessica Brown, for the furniture selections, procurement, delivery, and installation for the Penthouse at Lorient by Mosaic in Maroochydore.

Our experience with Jessica and her team was excellent. The team demonstrated professionalism and a high level of attention to detail throughout the project.

They were responsive to our needs and worked diligently to meet our expectations.

Working with Blink was a great experience and we look forward to future collaborations."
